

EDIBLE ROCK CYCLE

SUPPLIES:

ALUMINIUM FOIL

WAX PAPER

3 DIFFERENT COLORED STARBURSTS (YOU WILL NEED THESE 3 TIMES)

TOASTER OVEN

TOWELS

Steps:

There are three types of rocks (sedimentary, metamorphic and igneous). You will repeat these steps three times to make three types of rocks. Make sure there is adult supervision with the toaster oven.

1. Unwrap your 3 Starburst and lay the foil flat on the tape with the wax paper on top.
2. Stack the 3 Starburst on top of each other in the center of the wax paper
3. Roll the papers over the Starburst and cover them in the foil- Repeat these steps to make each rock
 - a. For sedimentary rocks, stand on the foil to create pressure.
 - b. For metamorphic rocks, place the foil in the toaster oven for 1 minute and 30 seconds.
 - c. For igneous rocks, place the foil in the toaster oven for 8 minutes- be careful, it will be very hot.
