

# Buoyant Sharks

DID YOU KNOW THAT SHARKS FLOAT IN THE OCEAN? THEY DO! SHARKS DO NOT SINK (UNLESS THEY STOP SWIMMING). LET US SEE HOW!

## MATERIALS:

2 GLASS CUPS OF WATER  
5 TABLESPOONS OF SALT  
2 EGGS

## STEPS:

1. PUT BOTH GLASSES OF WATER SIDE BY SIDE AND ADD THE SALT TO ONE OF THE GLASSES
2. PLACE AN EGG INTO EACH CUP, THE EGG WILL REPRESENT THE SHARK!
3. THE EGG IN THE SALTWATER SHOULD FLOAT! JUST LIKE SHARKS! THE SALT IN THE WATER IS MORE DENSE ALLOWING SHARKS TO FLOAT
