

# STEM Engineering Challenge

Build an aircraft using just these materials: **3 straws, 3 sheets of paper, 1 paper towel roll, 4 wooden dowels, tape and glue.**

**Reflection Question:** How did you build your aircraft? Draw a sketch of it here

**Reflection Question:** Who in your group made the aircraft that flew the farthest? What made theirs go the farthest?

**Reflection Question:** If you could remake your aircraft, what would be one change you would make?
